HALF MASK CARTRIDGE RESPIRATOR

The selection and use of the correct Personal Protective Equipment is essential to effectively protect users from risk by creating a barrier against workplace hazards.

Our F8 half mask uses a combination of a rubber face piece, with disposable cartridges.

MASK FEATURES :-

- Comfort - Construction of durable thermoplastic rubber
- Exhalation Valve - for low breathing resistance
- 4-point suspension harness with quick release buckles.
- Conforms to EN 140 Standard specifying the inward leakage testing, breathing resistance, flammability, and the mechanical tightness of valves and connections.

CARTRIDGES :-

- Our most popular cartridge is the A2-P3 Combination cartridge combines which combines 2 levels of protection. Conforms to EN 14387 Standard for gas and combination filters, and EN 143 providing the requirements for particle filters.
- **P3** White Layer – protects against all types of particles (dust, fume, fog, spray, asbestos) - Filters at least 99.95% of airborne particles
- **A2** Brown Layer – protects against Organic Gases & Vapors with a boiling point of > 65 °C

USES :-

- Typically this cartridge is used for Paint Spraying or Powder Coating.
- It is NOT suitable for protection against isocyanate paints which require Air Fed Respirators. All check the paint manufacturers data sheet for full advice.

Note :

This product only provides correct performance when used in accordance with manufacturer's instructions.
